

## Jogya Expo Center (JEC) Jl. Raya Janti Yogyakarta 19 - 20 Agustus 2015

East Jakarta Industrial Park Plot 4E Cikarang Bekasi

Email: iei\_recruitment@epson.co.id

Let's grow together with us

Email : lei_recruiti	-		DECLUSES AFAITS		
CATEGORY POSITION		JOB DESCRIPTION	REQUIREMENTS		
	ME01	Process:			
	Product	- Involving in engineering process of a product (lead			
	Engineering Staff	meetings, etc)			
		- Create ALO, WI, MOST			
		Analyst :	Prefered Major :		
		- conducting defect analysis up to root cause in engineering	- Mechanical in Energy Conversion		
		process of a product			
		- Conducting dimension measurement			
	ME02	- Designing product (Parts)	***************************************		
	Parts Engineering	- Drawing			
	Staff				
ENGINEERING	SE01	- Part Engineering : Process approval part from drawing	- Prefered D3 - S1 Major in Mechanical Engineering		
	Scanner	issue, PDR, MDR, Trial Mold	- Have knowledge about CAD sofware and Part Process		
	Engineering Staff	Inspection and Approval; Part quality controlling in vendor			
	Linginicering Stan	- Product Engineering: MOST, ALO, ACL, inprocess defect			
		analysis and counter measure evaluation and quality			
	DE01	- Creating jig/fixture for support production process /	- Prefered Major in Electrical Engineering		
	PE01	improvement & Modification	- Understand CAD and solid		
	Jigs Engineering Staff	- Controlling and monitoring fabrication process jig/fixture	- Experience at JTEC company is a plus		
	Starr				
		Designing electrical district /A 4-in 10 1 2	D2 C1 Floatsian Engine and a Understand P. St. 1 C. 1		
	DCD04	- Designing electrical circuit (Main controllingler, Power	- D3 - S1 Electrical Engineering, Understanding Electronic Circuit		
	PCB01	supply) board for printer - Evaluating electrical circuit & EMC and make the report	Analysis - Have knowledge Electrical Design and Evaluation Electronic		
	PCB Engineering	- Evaluating electrical circuit & Livic and make the report	Circuit Analysis		
	B4E02	Mecha Jig Design :	Circuit / titaly 515		
	ME03	- Designing mechanism of automation product	- Prefered Major in Mechanical Engineering		
	Automation	- Drawing	- Have knowledge about Automation System/Robotics		
	Mechanical Design Staff	Machine & Tools:	- Able to read Technical Drawing, (level Medium)		
	Design Stan	- Designing mechanism of automation product	- Familiar with 3D-2D Tools		
		- Drawing			
	MD01	- Designing mechanism of a product	***************************************		
	Product	- Sketching, Modelling & Drawing			
	Mechanical	- Conducting Evaluation (Mini, Production)			
	Design Staff				
DESIGN	2 00.8 010				
		- Designing printer's firmware to controlling printer mecha	- D3 - S1 Electronic / Informatic / Computer Engineering		
		- Designing printer's firmware to controlling printer mecha movement, copy, scanner, GUI, image processing	- D3 - S1 Electronic / Informatic / Computer Engineering - Have Knowledge sofware development and programming		
	FWD01				
	FWD01 F/W Design	movement, copy, scanner, GUI, image processing - Conducting designing process, from specification study, create designing concept, programming, debugging,			
	FWD01 F/W Design	movement, copy, scanner, GUI, image processing - Conducting designing process, from specification study,			
		movement, copy, scanner, GUI, image processing - Conducting designing process, from specification study, create designing concept, programming, debugging,			
	F/W Design	movement, copy, scanner, GUI, image processing - Conducting designing process, from specification study, create designing concept, programming, debugging,	- Have Knowledge sofware development and programming		
	F/W Design  QA01	movement, copy, scanner, GUI, image processing - Conducting designing process, from specification study, create designing concept, programming, debugging, evaluating in developing firmware			
QUALITY	F/W Design	movement, copy, scanner, GUI, image processing - Conducting designing process, from specification study, create designing concept, programming, debugging, evaluating in developing firmware - Handling shipping Finish Good MP quality assurance	- Have Knowledge sofware development and programming  - Prefered Major in Electrical, Industrial Engineering or		
QUALITY	F/W Design  QA01	movement, copy, scanner, GUI, image processing - Conducting designing process, from specification study, create designing concept, programming, debugging, evaluating in developing firmware  - Handling shipping Finish Good MP quality assurance - Handling major quality issue	- Have Knowledge sofware development and programming  - Prefered Major in Electrical, Industrial Engineering or Managament		
QUALITY	F/W Design  QA01	movement, copy, scanner, GUI, image processing  - Conducting designing process, from specification study, create designing concept, programming, debugging, evaluating in developing firmware  - Handling shipping Finish Good MP quality assurance - Handling major quality issue - Controlling & improving MP quality audit	- Have Knowledge sofware development and programming  - Prefered Major in Electrical, Industrial Engineering or Managament  - Have skill about quality audit		
QUALITY	F/W Design  QA01	movement, copy, scanner, GUI, image processing - Conducting designing process, from specification study, create designing concept, programming, debugging, evaluating in developing firmware  - Handling shipping Finish Good MP quality assurance - Handling major quality issue	- Have Knowledge sofware development and programming  - Prefered Major in Electrical, Industrial Engineering or Managament - Have skill about quality audit  - Prefered Major in Electrical or Mechanical Engineering		
QUALITY	F/W Design  QA01	movement, copy, scanner, GUI, image processing  - Conducting designing process, from specification study, create designing concept, programming, debugging, evaluating in developing firmware  - Handling shipping Finish Good MP quality assurance - Handling major quality issue - Controlling & improving MP quality audit	- Have Knowledge sofware development and programming  - Prefered Major in Electrical, Industrial Engineering or Managament  - Have skill about quality audit		
QUALITY	F/W Design  QA01	movement, copy, scanner, GUI, image processing  - Conducting designing process, from specification study, create designing concept, programming, debugging, evaluating in developing firmware  - Handling shipping Finish Good MP quality assurance - Handling major quality issue - Controlling & improving MP quality audit	- Have Knowledge sofware development and programming  - Prefered Major in Electrical, Industrial Engineering or Managament - Have skill about quality audit  - Prefered Major in Electrical or Mechanical Engineering - Have certificate of Health management system (SMK3), OHSAS		
QUALITY	F/W Design  QA01	movement, copy, scanner, GUI, image processing  - Conducting designing process, from specification study, create designing concept, programming, debugging, evaluating in developing firmware  - Handling shipping Finish Good MP quality assurance - Handling major quality issue - Controlling & improving MP quality audit	- Have Knowledge sofware development and programming  - Prefered Major in Electrical, Industrial Engineering or Managament  - Have skill about quality audit  - Prefered Major in Electrical or Mechanical Engineering  - Have certificate of Health management system (SMK3), OHSAS 18001, HIRAC concept, ISO 14001		
QUALITY	F/W Design  QA01	movement, copy, scanner, GUI, image processing  - Conducting designing process, from specification study, create designing concept, programming, debugging, evaluating in developing firmware  - Handling shipping Finish Good MP quality assurance - Handling major quality issue - Controlling & improving MP quality audit	- Have Knowledge sofware development and programming  - Prefered Major in Electrical, Industrial Engineering or Managament  - Have skill about quality audit  - Prefered Major in Electrical or Mechanical Engineering  - Have certificate of Health management system (SMK3), OHSAS 18001, HIRAC concept, ISO 14001		
QUALITY	F/W Design  QA01	movement, copy, scanner, GUI, image processing  - Conducting designing process, from specification study, create designing concept, programming, debugging, evaluating in developing firmware  - Handling shipping Finish Good MP quality assurance - Handling major quality issue - Controlling & improving MP quality audit	- Have Knowledge sofware development and programming  - Prefered Major in Electrical, Industrial Engineering or Managament  - Have skill about quality audit  - Prefered Major in Electrical or Mechanical Engineering  - Have certificate of Health management system (SMK3), OHSAS 18001, HIRAC concept, ISO 14001		
	F/W Design  QA01  QA Staff	movement, copy, scanner, GUI, image processing  - Conducting designing process, from specification study, create designing concept, programming, debugging, evaluating in developing firmware  - Handling shipping Finish Good MP quality assurance - Handling major quality issue - Controlling & improving MP quality audit	- Have Knowledge sofware development and programming  - Prefered Major in Electrical, Industrial Engineering or Managament  - Have skill about quality audit  - Prefered Major in Electrical or Mechanical Engineering  - Have certificate of Health management system (SMK3), OHSAS 18001, HIRAC concept, ISO 14001		
QUALITY	P/W Design  QA01  QA Staff  SS01	movement, copy, scanner, GUI, image processing  - Conducting designing process, from specification study, create designing concept, programming, debugging, evaluating in developing firmware  - Handling shipping Finish Good MP quality assurance - Handling major quality issue - Controlling & improving MP quality audit	- Have Knowledge sofware development and programming  - Prefered Major in Electrical, Industrial Engineering or Managament  - Have skill about quality audit  - Prefered Major in Electrical or Mechanical Engineering  - Have certificate of Health management system (SMK3), OHSAS 18001, HIRAC concept, ISO 14001		
	F/W Design  QA01  QA Staff	movement, copy, scanner, GUI, image processing - Conducting designing process, from specification study, create designing concept, programming, debugging, evaluating in developing firmware  - Handling shipping Finish Good MP quality assurance - Handling major quality issue - Controlling & improving MP quality audit	- Have Knowledge sofware development and programming  - Prefered Major in Electrical, Industrial Engineering or Managament  - Have skill about quality audit  - Prefered Major in Electrical or Mechanical Engineering  - Have certificate of Health management system (SMK3), OHSAS 18001, HIRAC concept, ISO 14001		
	P/W Design  QA01  QA Staff  SS01	movement, copy, scanner, GUI, image processing  - Conducting designing process, from specification study, create designing concept, programming, debugging, evaluating in developing firmware  - Handling shipping Finish Good MP quality assurance - Handling major quality issue - Controlling & improving MP quality audit	- Have Knowledge sofware development and programming  - Prefered Major in Electrical, Industrial Engineering or Managament  - Have skill about quality audit  - Prefered Major in Electrical or Mechanical Engineering  - Have certificate of Health management system (SMK3), OHSAS 18001, HIRAC concept, ISO 14001		
	P/W Design  QA01  QA Staff  SS01	movement, copy, scanner, GUI, image processing - Conducting designing process, from specification study, create designing concept, programming, debugging, evaluating in developing firmware  - Handling shipping Finish Good MP quality assurance - Handling major quality issue - Controlling & improving MP quality audit	- Have Knowledge sofware development and programming  - Prefered Major in Electrical, Industrial Engineering or Managament  - Have skill about quality audit  - Prefered Major in Electrical or Mechanical Engineering  - Have certificate of Health management system (SMK3), OHSAS 18001, HIRAC concept, ISO 14001		
	P/W Design  QA01  QA Staff  SS01	movement, copy, scanner, GUI, image processing - Conducting designing process, from specification study, create designing concept, programming, debugging, evaluating in developing firmware  - Handling shipping Finish Good MP quality assurance - Handling major quality issue - Controlling & improving MP quality audit  ###################################	- Have Knowledge sofware development and programming  - Prefered Major in Electrical, Industrial Engineering or Managament  - Have skill about quality audit  - Prefered Major in Electrical or Mechanical Engineering  - Have certificate of Health management system (SMK3), OHSAS 18001, HIRAC concept, ISO 14001		
	P/W Design  QA01  QA Staff  SS01	movement, copy, scanner, GUI, image processing - Conducting designing process, from specification study, create designing concept, programming, debugging, evaluating in developing firmware  - Handling shipping Finish Good MP quality assurance - Handling major quality issue - Controlling & improving MP quality audit  ###################################	- Have Knowledge sofware development and programming  - Prefered Major in Electrical, Industrial Engineering or Managament  - Have skill about quality audit  - Prefered Major in Electrical or Mechanical Engineering  - Have certificate of Health management system (SMK3), OHSAS 18001, HIRAC concept, ISO 14001		
	P/W Design  QA01  QA Staff  SS01	movement, copy, scanner, GUI, image processing - Conducting designing process, from specification study, create designing concept, programming, debugging, evaluating in developing firmware  - Handling shipping Finish Good MP quality assurance - Handling major quality issue - Controlling & improving MP quality audit  ###################################	- Have Knowledge sofware development and programming  - Prefered Major in Electrical, Industrial Engineering or Managament  - Have skill about quality audit  - Prefered Major in Electrical or Mechanical Engineering  - Have certificate of Health management system (SMK3), OHSAS 18001, HIRAC concept, ISO 14001		
	P/W Design  QA01  QA Staff  SS01	movement, copy, scanner, GUI, image processing  - Conducting designing process, from specification study, create designing concept, programming, debugging, evaluating in developing firmware  - Handling shipping Finish Good MP quality assurance - Handling major quality issue - Controlling & improving MP quality audit  ###################################	- Have Knowledge sofware development and programming  - Prefered Major in Electrical, Industrial Engineering or Managament  - Have skill about quality audit  - Prefered Major in Electrical or Mechanical Engineering  - Have certificate of Health management system (SMK3), OHSAS 18001, HIRAC concept, ISO 14001		
	P/W Design  QA01  QA Staff  SS01	movement, copy, scanner, GUI, image processing - Conducting designing process, from specification study, create designing concept, programming, debugging, evaluating in developing firmware  - Handling shipping Finish Good MP quality assurance - Handling major quality issue - Controlling & improving MP quality audit  ###################################	- Have Knowledge sofware development and programming  - Prefered Major in Electrical, Industrial Engineering or Managament - Have skill about quality audit  - Prefered Major in Electrical or Mechanical Engineering - Have certificate of Health management system (SMK3), OHSAS 18001, HIRAC concept, ISO 14001 - Have knowledge about safety controlling		
	QA01 QA Staff  SS01 Safety Staff	movement, copy, scanner, GUI, image processing - Conducting designing process, from specification study, create designing concept, programming, debugging, evaluating in developing firmware  - Handling shipping Finish Good MP quality assurance - Handling major quality issue - Controlling & improving MP quality audit  ###################################	- Have Knowledge sofware development and programming  - Prefered Major in Electrical, Industrial Engineering or Managament - Have skill about quality audit  - Prefered Major in Electrical or Mechanical Engineering - Have certificate of Health management system (SMK3), OHSAS 18001, HIRAC concept, ISO 14001 - Have knowledge about safety controlling		
	P/W Design  QA01 QA Staff  SS01 Safety Staff	movement, copy, scanner, GUI, image processing - Conducting designing process, from specification study, create designing concept, programming, debugging, evaluating in developing firmware  - Handling shipping Finish Good MP quality assurance - Handling major quality issue - Controlling & improving MP quality audit  ###################################	- Have Knowledge sofware development and programming  - Prefered Major in Electrical, Industrial Engineering or Managament - Have skill about quality audit  - Prefered Major in Electrical or Mechanical Engineering - Have certificate of Health management system (SMK3), OHSAS 18001, HIRAC concept, ISO 14001 - Have knowledge about safety controlling  - Prefered Major in Business Management, Supply Chain Management, Logisics/Transportation or Industrial Engineering		
SAFETY	P/W Design  QA01 QA Staff  SS01 Safety Staff  LI01 Logistics & Import	movement, copy, scanner, GUI, image processing - Conducting designing process, from specification study, create designing concept, programming, debugging, evaluating in developing firmware  - Handling shipping Finish Good MP quality assurance - Handling major quality issue - Controlling & improving MP quality audit  ###################################	- Have Knowledge sofware development and programming  - Prefered Major in Electrical, Industrial Engineering or Managament - Have skill about quality audit  - Prefered Major in Electrical or Mechanical Engineering - Have certificate of Health management system (SMK3), OHSAS 18001, HIRAC concept, ISO 14001 - Have knowledge about safety controlling		
SAFETY	P/W Design  QA01 QA Staff  SS01 Safety Staff	movement, copy, scanner, GUI, image processing - Conducting designing process, from specification study, create designing concept, programming, debugging, evaluating in developing firmware  - Handling shipping Finish Good MP quality assurance - Handling major quality issue - Controlling & improving MP quality audit  ###################################	- Have Knowledge sofware development and programming  - Prefered Major in Electrical, Industrial Engineering or Managament - Have skill about quality audit  - Prefered Major in Electrical or Mechanical Engineering - Have certificate of Health management system (SMK3), OHSAS 18001, HIRAC concept, ISO 14001 - Have knowledge about safety controlling  - Prefered Major in Business Management, Supply Chain Management, Logisics/Transportation or Industrial Engineering
